

**Loïc J. Blum** received the *Doctorat de spécialité* (1983) in Biochemistry and the *Doctorat d'Etat ès Sciences* (1991) from the University Claude Bernard Lyon 1. He is presently full Professor of Biochemistry and Biotechnology in the same university and is involved in the development of biosensors, bioanalytical micro and nano systems, biochips and biomimetic membranes. He developed several systems in the domain of bio-, chemi- and electrochemi-luminescence. Since 1983, he published ca. 180 peer-reviewed papers and about 50 book chapters, hold several patents. He has co-edited *Biosensor Principles and Applications*, Marcel Dekker,1991) and is the author of *Bio- and Chemi-Luminescent Sensors* (World Scientific, 1997). He is also Member of the Editorial Board of *Analytical Letters* and Editor of *Biosensors & Bioelectronics* (Elsevier). He is presently Vice-President for Partnership and Innovation of the University Claude Bernard Lyon 1.
